

GENERIC EMAIL IS TOSHSCANS@GMAIL.COM PASSWORD IS toshiba123 in all lowercase

HOW TO SET UP GOOGLE MAIL.....GMAIL

This is the set up I used to set up Gmail .

The screenshot displays a web browser window with the URL <http://10.160.31.95:8080/Default?MAIN=ADMIN&SUB=SETUP>. The browser shows a 'TopAccess' interface with a navigation menu on the left containing 'Device', 'Setup', and 'SMTP Client'. The 'SMTP Client' section is expanded, showing a list of configuration options. The main content area displays the 'SMTP Client' configuration page with the following settings:

Setting	Value
Enable SMTP Client	Enable
Enable SSL	Accept all certificates without CA
SSL/TLS	STARTTLS
SMTP Server Address	smtp.gmail.com
POP Before SMTP	Disable
Authentication	Login
Login Name	account name@gmail.com
Password	
Maximum Email / InternetFax Size	30 MB
Port Number	25
SMTP Client Connection Timeout(1-180)	30 Seconds

At the bottom of the configuration page, there are 'OK' and 'Cancel' buttons, and a message: 'Selecting 'Save' in the Main Window is required to Save the new settings.' The browser's taskbar shows several open applications, including 'Inbox - Micro...', 'SMTP Client...', and 'Microsoft Word'. The system tray indicates the time is 2:28 PM.

PASSWORD is the password set up at Gmail.

Account name is the account name that was set up at Gmail.
