

TOSHIBA

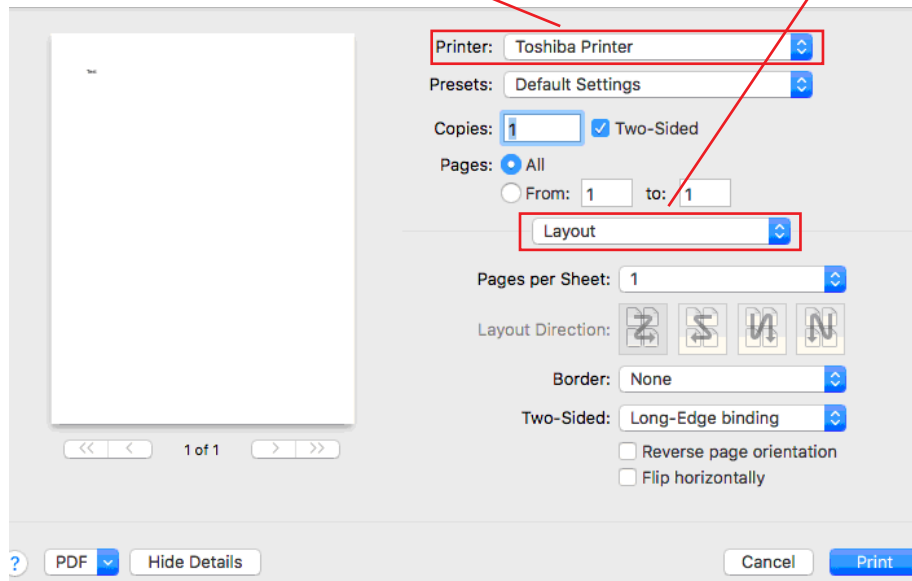

Setting Up A Preset On Your Mac Computer

This setup procedure can be used to setup any settings for the Toshiba print driver on your Mac computer. Our example model is setting up a preset for bypass printing.

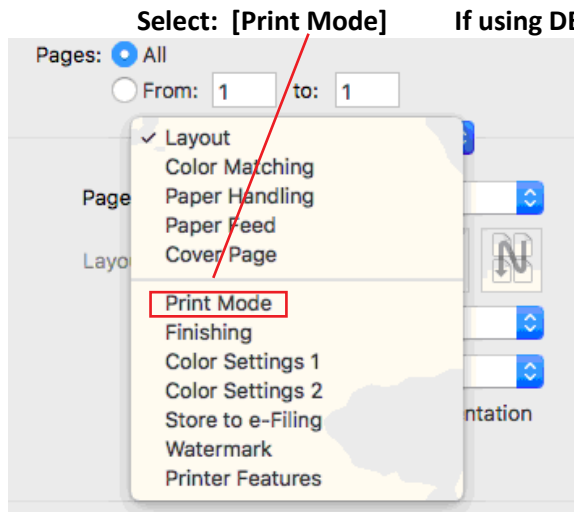

Open Your Document (Pages is used as our example)

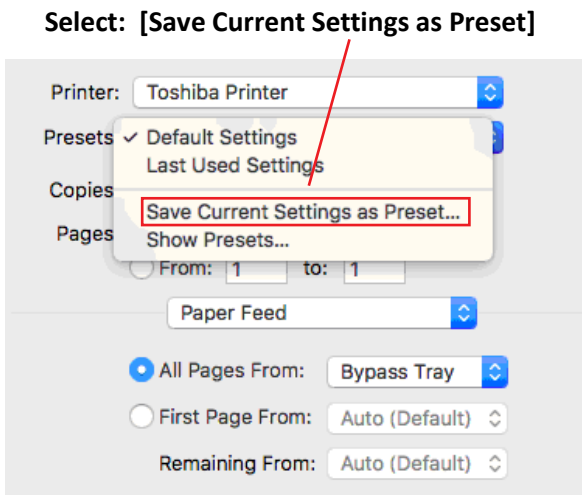

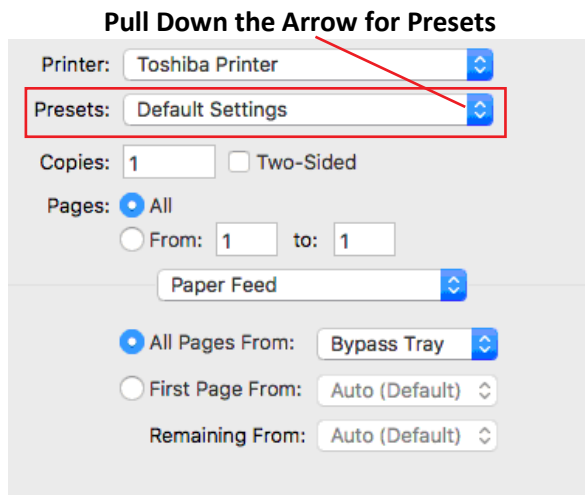

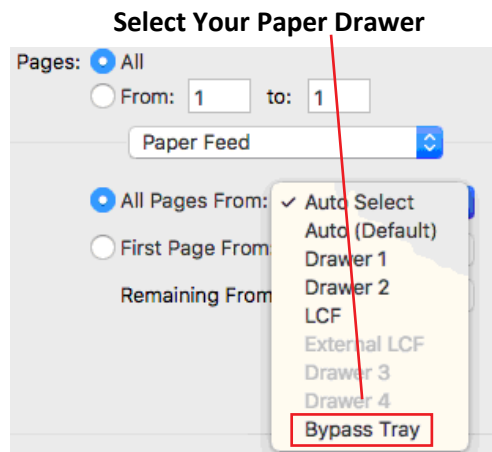

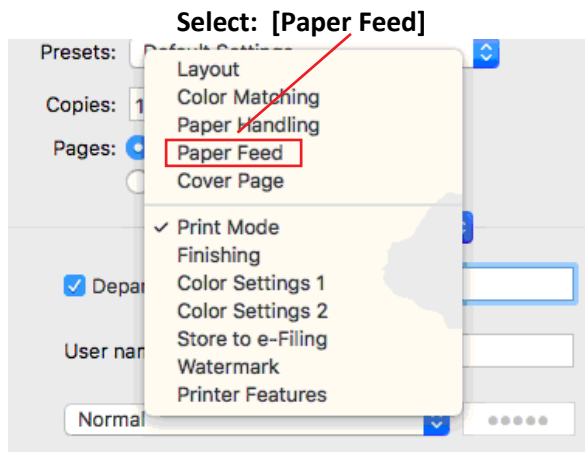

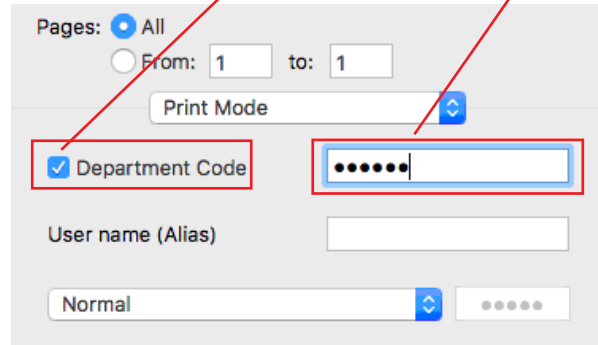

Make sure you have the TOSHIBA printer selected, Press: [Layout]

TOSHIBA

If using DEPARTMENT CODES, Check the box and enter your code

TOSHIBA

Assign Your Preset With a Name Of Your Choice, Press: [OK]

Preset Name: Toshiba Bypass Print with Code

Preset Available For: Only this printer
 All printers

Cancel OK

Paper Feed

All Pages From: Bypass Tray

Now you have this preset whenever you need to print specifically with this particular application.
