

Open your finder and go to your Applications folder and select the program you wish to open in 32bit mode. In this case its going to be Photoshop CS5.

Once you have found the application you wish to open, right click (or control click) on the application to bring up the context menu. On this menu you will choose the "Get Info" option.

Once you click on the the "Get Info" option another window will show up with information about the selected program. This is where you will choose the option to open in 32bit mode. Remember that once you choose this option this program will continue to open in 32bit mode until you uncheck this box.
