

How to create a short cut to the local file share on your Toshiba

1. Click go in the top tab bar on your Mac
2. Go to connect to server
3. Type in the below example using the IP address of your Toshiba
4. Click connect
5. Login as a guest if asked
6. Once connection is made, you will always be able to get to it clicking recent folders. It will be named file_share
